OUR ACADEMY

The ACADEMY OF DENTISTRY, formerly the Toronto dental society, has been functioning continuously since 1890. It has provided leadership and service to both the profession and the community, and will continue to do so in the future.

The OBJECTS of the Academy are:

1. Advancement of the art and science of dentistry.
2. To promote the highest ideals of dental practice.
3. Cultivation of harmony and good fellowship among its Fellows, and among the members of the dental profession generally.

Some of the specific services provided are as follows:

1. The Annual WINTER CLINIC.
2. After hours EMERGENCY TREATMENT service for the public.
3. The Annual WINTER CLINIC/INFORMATION BOOK, a directory of dental organizations.
4. The LADIES' AUXILIARY, which provides support for worthy dental projects, and various fellowship activities.
5. PUBLIC RELATIONS, a secretary to answer the public's queries and complaints.
6. An ELECTED COUNCIL, representing all Metro Toronto dentists and their local component societies.
7. CO-ORDINATION of dental and fellowship functions within Metro Toronto.
8. DENTAL MEETINGS with excellent programs and clinicians.
9. Assistance in formation of new STUDY GROUPS.
10. HONOURARY MEMBERSHIP to recognize outstanding dentists.
11. Fellowship activities such as the Annual GOLF TOURNAMENT, CURLING BONSPIEL, and SKI DAY.
12. MEDIATION services for the public.
13. COMMUNICATION with dental auxiliary organizations.
14. Provides an ASSOCIATE PLACEMENT service.

THIS IS OUR ACADEMY.
KEEP IT STRONG.
SUPPORT IT, ENJOY IT.

PRESIDENT'S MESSAGE

WAYNE PULVER, D.D.S.

It is my pleasure to welcome you to this most special Winter Clinic. The Academy of Dentistry is celebrating its 100th Anniversary.

To kick off the festivities we are holding a **GALA** at the Metro Toronto Convention Centre on Wednesday, November 21, 1990, the evening prior to the Winter Clinic.

The theme for the evening **GIVE HOPE TO A CHILD** reflects the

fact that all proceeds from the Gala will be directed to the Hugh Mac-Millan Medical Centre (formerly the Ontario Crippled Children's Centre). The Centre is recognized as the finest rehabilitation facility for physically disabled children and young adults in Canada.

Our Master of Ceremonies, **Charlie Farquharson** will keep us entertained along with dancing to the **Spitfire Band**. We will be treated to a performance by the talented **Andre Philippe Gagnon**. A special **Silent Auction** will be held throughout the evening.

The Committee, made up of the profession and the industry has been working hard to arrange this celebration — so please plan on attending and supporting this most worthwhile event. The **HANDICAPABLE** children and young adults need our help.

This will be our 53rd Annual Winter Clinic. It has become one of the most successful one-day meetings held in North America. Our Committee, under the direction of this year's Chairman Dr. Jerry Weisberg is once again offering a varied program for the entire dental team. Speakers on almost every discipline of dentistry have been selected. New for this year will be a series of Mini Clinics. The format of the day has been slightly altered. There will *not* be the usual formal dinner, but rather a light buffet will be served in the Exhibit Hall so you can continue to browse during the dinner hour.

The Dental Industry must be commended for their continued support of both the Winter Clinic and our Gala Celebration.

I look forward to greeting you Wednesday evening as we celebrate 100 years of organized dentistry in Toronto and the next day at the Winter Clinic meeting.

Have a wonderful evening and a great Winter Clinic day!

Wednesday, November 21, 1990

CHAIRMAN'S WELCOME

JERRY WEISBERG, D.D.S.

I find myself in the privileged position of being Winter Clinic Chairman in this, the Centennial year of the The Toronto Academy of Dentistry. In this capacity I extend a hearty and warm welcome to everyone attending this, our 53rd Annual Winter Clinic Meeting.

I can't imagine that our professional predecessors of one

hundred years ago would ever have been able to imagine the incredible advances in technology available to us today. Could those of us who graduated one, two or three decades ago have been able to imagine them?

Do you think our predecessors could have been able to foresee professional meetings of the size, stature and quality that exist today throughout North America of which our Winter Clinic is the premier one-day meeting?

The continuing success of our Winter Clinic is due to the dedicated and diligent work by our devoted committee members. In this same spirit, a program has been prepared for this year that keeps pace with the changes and challenges that are facing us now and that will face us in the future.

I hope that you and your staff will benefit from the excellent speakers and table clinics that have been prepared and that you will have the opportunity to visit our commercial exhibits.

Some changes have been made to this year's format that we believe will make the day a more memorable one.

We look forward to being your hosts for Winter Clinic in this landmark year for organized dentistry in Toronto.

WELCOME FROM THE O.D.H.A.

BEVERLEYANNE DRISCOLL

ODHA PRESIDENT

On behalf of the Ontario Dental Hygienists' Association it is my pleasure to welcome you to this year's Winter Clinic. I would also like to congratulate the Academy of Dentistry on this, their *Centennial Anniversary* and I commend the Planning Committee members on another successful day of Continuing Education.

Belonging to a profession carries a responsibility to participate in the growth of the profession. The ODHA exists to serve the essential and current needs of its professional members. Our Mission Statement reads: "To ensure that the dental hygienist is recognized as a principal partner in the promotion of oral health".

Join me and your fellow colleagues as we emerge into the 90's together, *strong* and *determined* to meet our needs and the needs of the public.

Learn, Participate and Have Fun Today!

O.D.N. & A.A. WELCOME

CATHY BLAKE, C.D.A. C.D.R.

PRESIDENT

Welcome to the 53rd Annual Winter Clinic, and a day of continuing education.

On behalf of the Ontario Dental Nurses and Assistants Association, it is my pleasure to extend appreciation to the Academy of Dentistry for making this day possible.

As we meet the challenges of the 90's, we must keep abreast with the changing world of dentistry. What a perfect day for the dental health care team to have the opportunity to broaden their horizons, enrich their careers and have contact with other professionals.

Special thanks to our Clinic Committee Chairman, Lynne Brandon, and our Executive Liaison, Nancy Block.

The Future is

PHOT-X

2001CP

Intraoral Dental X-ray

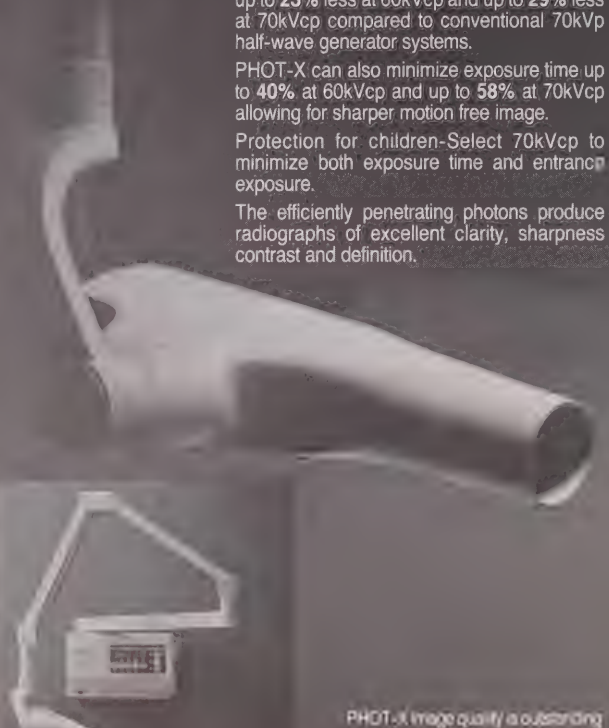

PHOT-X can provide "more efficient rays" and minimize the harmful "soft ray" exposure dose.

PHOT-X can reduce the initial skin exposure up to **23%** less at 60kVcp and up to **29%** less at 70kVcp compared to conventional 70kVp half-wave generator systems.

PHOT-X can also minimize exposure time up to **40%** at 60kVcp and up to **58%** at 70kVcp allowing for sharper motion free image.

Protection for children-Select 70kVcp to minimize both exposure time and entrance exposure.

The efficiently penetrating photons produce radiographs of excellent clarity, sharpness contrast and definition.

PHOT-X image quality is outstanding as a result of Constant Potential Technology, small focal spot, and Belmont functional design.

Belmont, a leading X-Ray manufacturer.

PHOT-X is the result of a dedicated research and development program at Belmont and an on-going factory testing program supported by Belmont Field Service and technical representatives.

For more information on the PHOT-X, contact your nearest Belmont Equipment Dealer or call Takara Company Canada Ltd., 2076 S. Sheridan Way, Mississauga, Ont., L5J 2M4.

REPUTATION — RELIABILITY — RELATIONSHIPS — KEY FACTORS TO YOUR SUCCESS: EVERYONE ACCOMPLISHES MORE!

PATRICIA FRIPP

SYNOPSIS

With the genesis of dentistry from a categorical macro style of practice to a more discretionary micro style of practice the maxim "inform before you perform" has taken on critical meaning. We are now obligated more than ever to communicate the nature of what we intend to do. In order to achieve that end the dentist and the office team must convey to the patient a syn-

chronized treatment plan. Patricia will describe — Creative Thinking for Better Business; practical ideas on how the entire staff as individuals can deal with people, promote business, manage their time and think creatively about their environment.

BIOGRAPHY

Patricia Fripp is a leader among speakers. In 1981 she received the Certified Speaking Professional (CSP) designation. In 1983 she received the Council of Peers Award for Excellence (CPAE) and in 1984 she became the first female president of the 3000 member National Speakers Association (NSA).

Room: Theatre

Time: 9:00 - 11:30 a.m. and 2:15 - 4:30 p.m.

Chairman: Dr. Al Puskas

PATRICIA'S PRESENTATION IS AN ALL-DAY LIMITED ATTENDANCE SEMINAR OF INTEREST AND VALUE TO THE ENTIRE DENTAL TEAM.

COMPOSITE AND BONDING FOR THE '90'S

JAMES C. HAMILTON, D.D.S.

SYNOPSIS

What makes a good dentin enamel bonding agent? Is heat and pressure cured composite better than light and heat-cured? The answers to these and other questions may surprise you. This lecture will review the recent changes in composite, bonding agents, and techniques and make predictions for the future. Special attention will

be spent on direct and indirect composite veneers and inlays. Also learn the truth about "light-cure" glass ionomer cements. Come and learn what has worked and what hasn't.

BIOGRAPHY

As Director of Technical Services at Kerr, Dr. Hamilton is probably the most knowledgeable person on the clinical use and technical properties of Kerr products. Currently he consults on all phases of new product development and coordinates worldwide field testing of Kerr products. Dr. Hamilton has lectured throughout the world on dental materials and is the author of three patents and many published articles.

Room: 205D

Time: 9:00 - 11:30 a.m. and 2:15 - 4:30 p.m.

Chairman: Dr. Ron Traub

THE ACADEMY OF DENTISTRY ACKNOWLEDGES AND THANKS
KERR CANADA FOR THE SPONSORSHIP OF DR. JAMES HAMILTON'S

CROWN AND BRIDGE FROM THE PREPARATION TO CEMENTATION: THE ESSENTIAL IMPORTANCE OF TEMPORIZATION AS A BLUEPRINT FOR SUCCESS

DAVID R. FREDERICK, B.S., D.M.D., M.Sc.D.

SYNOPSIS

The preparations are completed but much needs to be done to "bridge the gap" before cementation.

Abusive, ugly and complicating temporary restorations too often have compromised the success of our efforts. It is essential that this part of the therapeutic continuum is biomechanically sound. This restoration must promote perio-

dental health, provide comfort and function with pleasing aesthetics.

The purpose of this in depth presentation is to provide the means for dental assistants and dental technicians to participate if possible *with* the dentist in the fabrication of the temporary restorations to their mutual satisfaction. Thus all members of the office team are encouraged to attend.

The curriculum will consist of lecture topics, case presentations, discussions and graphic technique administrations. Multiple hand-outs with material lists, references and technique sheets will be distributed.

Just a few of the items to be presented are:

Selecting the *correct* resin and cement • Selecting, adapting and seating preformed crowns • Elastic pre-preparation technique • Plastic stents: putty to vacuum • Reline technique • Lab fabricated custom provisionals • Interim resin facings for laminates • Partial coverage temporaries • Light cured composite provisionals • Provisionals for implants • Contour and embrasure control • Repairing provisionals • Polishing and glazing • Cementation short and long term • Renewal technique

BIOGRAPHY

Dr. Frederick holds his M.Sc.D. in fixed and removable prosthodontics from Boston University and was Assistant Professor and Director, Crown and Bridge Foreign Continuing Education at UCLA School of Dentistry. He has presented world-wide and practises periodontal prosthetics in Los Angeles.

Room: 205B

Time: 9:00 - 11:30 a.m. and 2:15 - 4:30 p.m.

Chairman: Dr. Peter Haslam

ENHANCING YOUR PERIODONTAL PROCEDURES (ARE YOU SATISFIED WITH YOUR PERIO PROGRAM?)

DENNIS M. THOMPSON, D.D.S., P.C.

SYNOPSIS

This concise half day program will provide timely and most importantly, practical information regarding all phases of initial periodontal care. The light hearted presentation begins with a visualization of a wide array of perio problems, then focusses on current thinking regarding etiology. Next, helpful hints on gaining patient acceptance are intertwined with

treatment planning and x-ray review. The treatment section covers all of your questions on the use of antimicrobials, irrigation, root planning, risk management, and the importance of a timely perio referral.

BIOGRAPHY

Dr. Thompson is a Board Certified periodontist who maintains a private practice in Denver, Colorado. He has maintained an active lecture schedule in Canada and the United States, speaking on advances in periodontics. Dr. Thompson's lectures emphasize the practical-pragmatic approach to everyday periodontal care, where he is especially attuned to the unique needs of the general practitioner and hygienist who are integrating perio dental therapy into their practice.

Room: 206D

ILLEGAL STREET DRUGS — A GROWING FAMILY CONCERN

CONSTABLE JOHN HENDERSON

SYNOPSIS

Last summer the people of Toronto were shocked by the arrest in Jamaica of a child of 12 attempting to smuggle marijuana and cocaine to Canada. The intricacy and magnitude of the operation were nothing short of bizarre.

Although we would like to segregate by class those children who participated and say it can't happen to us, any sober analysis must

provoke personal concern. RCMP Constable Henderson will present a brief overview of the drug scene in Ontario, identifying pertinent street drugs, the prices and means of payment, the important signs and symptoms of the drug user as well as the means of understanding why there is a demand and the solution. An extended question period will be provided.

BIOGRAPHY

Constable Henderson has spent the past six years of his 16-year career with the Royal Canadian Mounted Police with the London, Ontario Combined Forces Drug Section.

CLINICAL PHARMACOLOGY IN DENTAL PRACTICE

SAM V. HOLROYD, D.D.S., M.S.

SYNOPSIS

Dentists today must face a vast array of pharmacologic agents. They must be knowledgeable not only in order to effectively control infection, pain and anxiety but also to discriminate not only for the least possible side effects but most importantly the ultimate mortality of their patients.

Dr. Holroyd will present clinically oriented information relative to the use of drugs in dental practice. An emphasis will be placed on practical material and problem areas. Drugs will be considered principally from the standpoint of obtaining maximal effectiveness while suffering minimal adverse effects.

Areas to be discussed include: *Antimicrobial Agents* (principles of infection control and clinically important characteristics of specific antibiotics), *Analgesics* (principles of pain control and clinically important characteristics of specific analgesics), *Sedatives and Tranquilizers* (principles of anxiety control and clinically important characteristics of specific drugs), *Local Anesthetics and Vasoconstrictors* (adverse potentialities and their control), *Status of Plaque and Calculus Control oral rinses and toothpastes* and if time permits, *The Dental Significance of Medically Prescribed Drugs*. (The coverage of huge amounts of material will be facilitated by the use of handouts which will provide guidance for participant thought and reduce the requirements for note taking).

BIOGRAPHY

Dr. Holroyd is Professor and Chairman, Department of Periodontics and Professor of Pharmacology, Washington University School of Dental Medicine, St. Louis, Missouri. He is in private specialty practice in St. Louis.

Room: 202D

Time: 9:00 - 11:30 a.m. and 2:15 - 4:30 p.m.

THE CHILD AND FAMILY OF THE 90'S — A PSYCHIATRIC AND PSYCHOLOGICAL PROFILE

KEITH R. MORLEY, C.D., B.Sc., D.M.D., F.R.C.D.(C)

SYNOPSIS

Canadian citizens are constantly being bombarded by the media with tales of ever-increasing levels of violence, particularly among our youth. This presentation will analyze current sociological data supplied by the Children's Aid Society, a variety of police forces, and a number of prominent pediatric psychologists and psychiatrists. Current pediatric literature also states that more and more young patients are presenting as difficult management problems due to these dramatic changes. The essential triad of practice — the relationship between the parent, the child and the practitioner will be discussed. Practical techniques will be given that will dramatically reduce the stress for you and your staff in dealing with the ever increasing demands of today's pediatric patients and parents. These improved methods of management will allow you to practice more efficiently and effectively.

BIOGRAPHY

After an extensive career in the Canadian Forces Dental Services, Dr. Morley now has a private pediatric dental practice in Barrie, Ontario. He teaches at University of Toronto, Department of Pediatric Dentistry and has lectured extensively throughout Canada, the United States and internationally. Dr. Morley has published numerous articles and has been interviewed on national television and radio.

UNDERSTANDING THE DYNAMICS OF POST PLACEMENT AND FUNCTION

BARRY MUSIKANT, D.M.D.

SYNOPSIS

Excellent restorations continue to be lost because of inadequate or improper post placement.

Would you like to know what that post really does? Is it *causing* stress not containing it? Is its area concentration a predisposition to fracture? Is the stress under compression or oblique load? Do different designs matter? Instead of thinking all is safe and reasonable,

Dr. Musikant will give you the tools for you to *visualize* the answers to all the above and more.

With proper post design a threaded post cannot fracture a root. You will be shown that "passive" posts are not really passive! Best of all you will be aware of the connection between the forces needed to insert a post and the consequent stresses.

Dr. Musikant will analyze Flexi-Post, Para Post Plus, Radix and Dentatus. At the end of this course you will truly understand the dynamics of post placement and function.

BIOGRAPHY

Dr. Musikant is a certified endodontist. He is on the teaching staff of the University of Pittsburgh and the University of Pennsylvania as well as a dental researcher particularly with Essential Dental Systems.

Room: 203B

BRIDGING THE GAPS IN YOUR INVESTMENT PROGRAM (Successful Investing for Dentists) MIRIAM VARADI

SYNOPSIS

This seminar will deal with the special needs of a busy professional trying to develop and maintain a sound investment plan. A successful investment program strives to reduce taxes, compound money, and manage risk through a combination of interest, dividends and capital gains. This has become a difficult task in these times of rapid economic, political and tax

change. This seminar will present the necessary components in a good investment program, discuss common errors, and provide insight into the current investment environment.

BIOGRAPHY

Miriam Varadi is a Senior Account Executive at Nesbitt Thomson. She is ranked in the top ten percent of Nesbitt Thomson stock brokers nationally. She was awarded an A. Deane Nesbitt Award in 1988.

Miriam lectures extensively to many professional associations and has been interviewed and quoted in many publications including The Financial Post, The Toronto Star and the Physicians' Management Manual.

THE INSIDE STORY (Morning Clinic)

PATRICIA A. BURGER, R.D.H., C.D.A., B.A.

SYNOPSIS

Are you aware of all the aspects that you need to know to produce the highest quality *radiographs* possible? This clinic will cover such pertinent subjects as: How often should Radiographs be taken? • How much is too much radiation? • Taking radiographs of the difficult patient • Proper positioning of patient, film and camera • Darkroom requirements and pro-

cedures • Film processing failures (Causes and corrective measures) • Legal aspects of radiographs.

The primary goal of this seminar is to assist the beginning operator in gaining confidence and to sharpen the techniques, add new data and clarify or alleviate problems the experienced operator may be encountering.

TOUCH YOUR PATIENT WITH LOVE (Afternoon Clinic)

SYNOPSIS

This is a seminar exploring the communication — motivation aspects between dental personnel and the patient. Although humorous at times this lecture tells the true story of how we frighten our patients with words and deeds. In an objective way we must observe ourselves and other staff members in our office and start to recognize the conscious and unconscious acts that occur daily that can and must be changed. We must start with ourselves to develop attitudes and actions that will motivate our patients. Dental phraseology and instruments are frightening to patients and tend to form a barrier that prevents a good communication and motivation process from occurring. Ms. Burger suggests logical steps dental personnel can take to correct the everyday blunders we make so that patients will truly want to come to the dental office.

BIOGRAPHY

Patti is an international speaker and has appeared at many prestigious meetings such as the Chicago Mid-Winter Meeting, Greater New York, Thomas P. Hinman Meeting, California, Hawaii, and Les Journees Dentaire Quebec. She has taught dental assisting and also instructed staffs of nursing homes in correct oral care for patients. Patti recently organized and participated in three scientific and technological exchange programs in the Republic of China. She is currently working towards her Masters Degree and is a Dental Education Consultant lecturing internationally.

THESE SESSIONS ARE OF PARTICULAR INTEREST TO DENTAL NURSES, ASSISTANTS AND HYGIENISTS.

Room: 206B

Time: 9:00 - 11:30 a.m. and 2:15 - 4:45 p.m.

COMPUTERIZATION — DON'T LET IT HAPPEN TO YOU!

(Morning Session)

PATRICIA GLOVER

This program is geared to the computer phobic or to the office that wants to computerize, but does not know how to go about it. Discussions will include how to assess their particular needs, how to prepare a “shopping list” to help compare system features and what to look for from the various vendors. The implementation and assimilation into the office daily routine will also be covered. The mini-clinic will cover ease of patient treatment entry, recall control, reporting at the touch of a key, and simple word processing for your marketing efforts.

A COMPUTER IS A TERRIBLE THING TO WASTE (Afternoon Session)

This program caters to the experienced and more sophisticated users of a computer. Accounting functions, practice monitoring, appointment scheduling and treatment planning in an automated environment will be explored. This session will also be followed by a mini-clinic.

BIOGRAPHY

Patricia's 10 year involvement with the dental community has been primarily focused on successful practice management through automation. She is currently Dental Software Supervisor for Safeguard Business Systems. Patricia is a member of the ODA task force for EDI — Electronic Data Interchange.

Room: 104D

Time: 9:00 - 11:00 a.m. and 2:15 - 4:30 p.m.

Chairman: Dr. Warren Hing

THIS IS A LIMITED ATTENDANCE CLINIC. USE THE REGISTRATION FORM AT THE FRONT OF THE BOOK TO PRE-REGISTER.

THE ACADEMY OF DENTISTRY THANKS AND ACKNOWLEDGES SAFEGUARD BUSINESS SYSTEMS FOR THEIR SPONSORSHIP OF THIS PRESENTATION.

DENTAL IMPLANTS: THE FUTURE IS NOW! (Morning Session)

AARON FENTON, D.D.S., M.S., F.R.C.D.(C)

SYNOPSIS

Jules Verne could not have predicted that the 20th Century would have so much to offer dentistry. The principles of osseointegration as published by P.I. Branemark have allowed for an evolution of new frontiers of therapy.

This presentation will outline the development of osseointegration as the success story of the 80's. It allows the dental profession to

predictably replace the missing dentitions of our patients with a variety of dental designs. Different prosthodontic applications of dental implants will be illustrated so that participants will have a good understanding of the potential scope of this therapy for restoring patients in their practices.

BIOGRAPHY

Dr. Fenton is Associate Professor of Prosthodontics at the University of Toronto. He maintains a private prosthodontic practice in Toronto and has worked with dental implants since 1979.

Room: 104B

Time: 9:00 - 11:30 a.m.

Chairman: Dr. Mark Panzer

Afternoon Session — Limited Attendance

Mr. Andy Rivest, Product Specialist for Nobelpharma Canada Inc. will give a brief lecture/slide presentation overview on product design and component nomenclature. After the presentation participants will be divided into groups and will spend time at each of four demonstration tables to observe the technique and components employed for the various applications of Overdenture, Single Tooth, Angulated Abutment and Full Arch.

THIS LIMITED ATTENDANCE PRESENTATION IS AN INFORMATION/ DEMONSTRATION ONLY. IT IS NOT A TRAINING SESSION. USE REGISTRATION FORM TO PRE-REGISTER.

Room: 104B

Time: 2:15 - 4:30 p.m.

THE ACADEMY OF DENTISTRY THANKS AND ACKNOWLEDGES NOBELPHARMA CANADA FOR THEIR SPONSORSHIP AND PARTICIPATION IN THIS FULL DAY PRESENTATION.

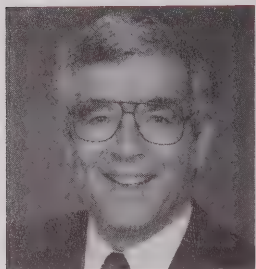

— MINI CLINICS —

(Room 201F 9:00 - 11:45 a.m.)

TREATMENT OF TRAUMA IN THE YOUNG PERMANENT DENTITION

FRANKLIN PULVER, D.D.S., M.S., F.R.C.D.(C), F.I.C.D.

Time: 9:00 - 9:45 a.m.

SYNOPSIS

A simplified classification of the various types of traumatic injuries will be presented. A systematic approach to treating these teeth in the young permanent dentition, utilizing the acid-etch bonding technique, will be thoroughly discussed. Some new innovations will also be presented to enable the practitioner to treat these types

of often difficult situations in a positive manner in order to satisfy both the apprehensive patient and the very concerned parent.

BIOGRAPHY

Dr. Pulver is presently President, The International Association of Dentistry for Children. He is an Assistant Professor in the Department of Pediatric Dentistry, University of Toronto and on staff, Mount Sinai Hospital, Toronto. Dr. Pulver maintains a private practice limited to Dentistry for Children and Adolescents in Toronto.

PERIODONTAL AND PERI- IMPLANT REGENERATION TECHNIQUES

MURRAY ARLIN, D.D.S., F.R.C.D.(C)

Time: 10:00 - 10:45 a.m.

SYNOPSIS

New surgical techniques are now available that can predictably regenerate hard and soft tissues to a degree not possible just a few years ago. This presentation will cover techniques of mucogingival, osseous grafting and G.T.R. (guided tissue regeneration) surgery and how they can be applied to both the natural dentition and

continued

MINI CLINICS *continued*

osseointegrated dental implants.

With the use of these newer techniques, in the natural dentition, cases will be shown that demonstrate "root coverage" with keratinized gingiva and true periodontal regeneration (ie — "new" bone, cementum and periodontal ligament). With osseointegrated dental implants cases will be shown where complete bone fill and "new" bone regeneration was realized with the utilization of these newer techniques. In addition, guidelines for placement of implants into fresh extraction sockets in order to assure excellent results will be covered.

Emphasis will be placed on the actual surgical techniques, case selection and patient follow up.

BIOGRAPHY

Dr. Arlin is a clinical demonstrator and lecturer in the Department of Periodontics, University of Toronto. He has lectured widely and is the author of many papers on periodontal and implant procedures. He maintains a full time practice in periodontics and implantology in Toronto.

TEMPORO-MANDIBULAR JOINT ARTHROSCOPY — WHEN, WHY AND HOW?

JACK G. ZOSKY, D.D.S., F.R.C.D.(C)

Time: 11:00 - 11:45 a.m.

SYNOPSIS

Through the development and improvement of Temporo-mandibular joint arthroscopy, detailed anatomic knowledge of the joint has been increased, the pathophysiology of joint disease is much better understood, and the side effects of surgical treatment have been reduced.

In this presentation Dr. Zosky will give a brief historical perspec-

tive of arthroscopy and he will discuss the indications and rationale for using this technique. Clinical results will be evaluated and a video will be shown illustrating the diagnostic and operative procedures.

As a complete non-sequitur Dr. Zosky is going to show some clinical cases of the treatment of partial anodontia and cleft defects utilizing endosteal implants. These cases are of children referred from the Hugh MacMillan Centre.

BIOGRAPHY

Dr. Zosky is President of the Canadian Association of Oral and Maxillofacial Surgeons; Chief of Oral and Maxillofacial Surgery, Orthopaedic and Arthritic Hospital; Associate, Oral Surgery Department, University of Toronto, and Examiner for the Royal College Specialty Section in Oral and Maxillofacial Surgery. He maintains a private practice in Oral Surgery in Toronto.

Chairman for the morning: Dr. Mark Gwartz

'DIVORCE WARS' (FAMILY LAW FOR THE 90'S)

PHILIP M. EPSTEIN, Q.C.

SYNOPSIS

Mr. Epstein will speak about the significant breakdown of the family in the 90's, the spiralling divorce rate and the consequences to the family both in terms of the emotional consequences and the financial consequences. He will canvas in some detail the financial effects of marriage breakdown to dentists and will focus on issues such as the value of dental practices and the value of professional dental licences. Mr. Epstein will also discuss some alternate methods of dispute resolution for parties who undergo a marriage breakdown.

BIOGRAPHY

Philip Epstein is the senior partner in the firm of Epstein, Cole in Toronto. He practises family law and defence of solicitor's malpractice claims. Mr. Epstein teaches a course in advanced family law at the University of Toronto.

TECHNICAL RESEARCH CONSORTIUM

HONOURARY LIFE MEMBERSHIP

KENNETH FRANKLYN POWNALL,

D.D.S., F.R.C.D(C) HON., F.A.C.D., F.I.C.D.

The Toronto Academy of Dentistry is pleased at its Annual Winter Clinic Meeting 1990 and in its Centennial Year to present for Honorary Life Membership in the Academy, Dr. Kenneth Franklyn Pownall. In Ontario, perhaps no one is better known and respected by his dental colleagues than Ken Pownall.

This distinction does not happen accidentally. For almost forty years, Ken has been a part of organized dentistry principally as Registrar-Secretary-Treasurer of the Royal College of Dental Surgeons of Ontario. In this position he has constantly been in touch with his fellow professionals acting to maintain the dentist-patient relationship.

However, that is only one of the reasons for the Academy's choice of Ken for its award. There are many additional services that Ken has extended to his profession and his community over the years.

Following service during the Second World War, Ken enrolled in dentistry at the University of Toronto and graduated in 1951.

From 1951 to 1965 Ken practised privately in Etobicoke during which period he became President of the West Toronto Dental Society, its Councillor to the Toronto Academy of Dentistry, its Governor of the ODA, and a member of the Council of Public Health and The Council on Ethics of the Canadian Dental Association.

continued

continued

It was not surprising that in 1965 Ken was appointed Registrar-Secretary-Treasurer of The Royal College of Dental Surgeons of Ontario. In addition he acted as Secretary-Treasurer of the Dentists Legal Protective Association of Ontario, was the first Secretary-Treasurer of the Ontario Section of the Academy of General Dentistry and from 1966 to 1972, during its major reorganization, he served as Secretary-Treasurer of the O.D.A.

Since 1965 Ken has taught at the U of T Faculty of Dentistry on the subjects of jurisprudence, ethics, history and forensic odontology. In respect of the latter, he was a co-founder in 1971 of the Canadian Society of Forensic Odontology. He has also lectured at the University of Western Ontario as well as being a member of the Admissions Committees of both schools.

Additionally Ken spent six years on the C.D.A.'s Council on Education and Accreditation and on the Dental Advisory Committees of the Colleges of Applied Arts and Technology.

Necessarily, this expansive contribution to his profession has been recognized by his being made a Fellow of the American College of Dentists (1968), a Fellow of the International College of Dentists (1968), an Honourary Member of the Ontario Dental Association (1990), the Ontario Dental Hygienists' Association (1990), the Ontario Dental Nurses and Assistants Association (1982), the Hamilton Academy of Dentistry (1968), and in August 1990 he became an Honourary Fellow of the Royal College of Dentists of Canada.

Throughout this time, Ken has been ably assisted by his wife Nora, who herself has held many important political offices in her community. Together they raised three children, John, Janet and Keith.

But it is one thing to concertedly serve one's own profession, it is another to carry that sense of service to one's community. Characteristically, in addition to the foregoing, Ken is a member of the Board of Directors of the Ontario Blue Cross. He is a director of the Toronto Kiwanis Music Festival, an active member of the Masonic Order and Rector's Warden at Christ Church in Etobicoke.

Collectively, it is with pride that the Toronto Academy of Dentistry bestows upon Kenneth Franklyn Pownall its Honourary Life Membership.

FIRST STATED MEETING

FRIDAY, FEBRUARY 1, 1991

ROYAL YORK HOTEL

NUTRITION, FITNESS AND BODY FAT

Presented by
COVERT BAILEY
Tigard, Oregon

Covert Bailey, famous for making fitness and nutrition concepts understandable and motivating, is a trusted leader in the health field. Fat — not weight — is the enemy, claims Mr. Bailey, and lifelong fat control is attainable with as little as 20 minutes of daily exercise. In addition, Bailey's rules for a perfect diet assure a lean and healthy lifestyle.

The basic intent of this program will be to show the healthful metabolic changes that occur in people who undertake a regular program of exercise and lowfat diet and conversely why fat people are at higher risk of disease.

Some topics to be covered during this presentation include:

- Relationship of body fat to disease.*
- Level of body fat in healthy vs. average people.*
- The difference between overfat and overweight.*
- Lean body mass vs. fat mass.*
- Effects of exercise on body fat percentage.*
- Effects of exercise on mitochondria and intramuscular fat.*
- Methods of exercise for quickest results.*
- Results of fasting in the obese vs. fit person.*

Use the enclosed REGISTRATION FORM to reserve now or look for the EARLY BIRD REGISTRATION DESK at the Winter Clinic. Reduced fees being offered for those who register on or before WINTER CLINIC.

EMERGENCY SERVICE

Support the Academy's Emergency Service by placing its telephone number on your answering machine when you are out of the office.

HOURS:

Monday — Friday

4:30 p.m. — 1:00 a.m.

Saturday, Sunday and Holidays

9:00 a.m. — 1:00 a.m.

TELEPHONE: 924-8041

During daytime hours, the Academy office (967-5649) will refer patients to dentists who accept new and/or emergency patients.

***If you are interested in
becoming a member of this service,
contact the Academy office.***

**Dr. Jerry Weisberg
Dr. Warren Hing

1893-94 N. Pearson*	1941-42 Steward A. MacGregor
1894-95 W.H. Wunder*	1942-43 Lloyd M. Grose*
1895-96 G.S. Martin*	1943-44 Charles McLean*
1896-97 H.E. Eaton*	1944-45 Harold Skilling*
1897-98 J.J. McDonagh*	1945-46 Harold Swales*
1898-99 J.E. Wilkinson*	1946-47 H. Colton Bliss*
1899-1900 J.B. Willmott*	1947-48 F. Harold Shepherd*
1900-01 A.E. Webster*	1948-49 Joseph H. Johnson*
1901-02 F.D. Price*	1949-50 Edgar A. White
1902-03 W.E. Willmott*	1950-51 Earl Bancroft*
1903-04 G.S. Martin*	1951-52 Mark G. Boyes
1904-05 C.E. Pearson*	1952-53 J. Gordon Chalmers*
1905-06 W.G.L. Spaulding*	1953-54 Elmer J. Henderson*
1906-07 J.B. Willmott*	1954-55 W. James Smith*
1907-08 R.G. McLaughlin*	1955-56 J. Bevan King*
1908-09 A.J. McDonagh*	1956-57 Harvey Milburn
1909-10 H.E. Eaton*	1957-58 Robert W. Marshall
1910-11 A.E. Webster*	1958-59 William A. Weir
1911-12 A.D.A. Mason*	1959-60 James A. Bigelow
1912-13 C.A. Kennedy*	1960-61 Vernon A. Herron*
1913-14 W.E. Willmott*	1961-62 Arthur E. Histrop*
1914-15 G.W. Grieve*	1962-63 John H. Mullett
1915-16 F.C. Husband*	1963-64 Robert M. Grainger
1916-17 E.F. Arnold*	1964-65 J.E. Carson McGowan
1917-18 W.B.T. Amy*	1965-66 Murray Cornish
1918-19 J.E. Rhind*	1966-67 Morley G. Hardy
1919-20 R.D. Thornton*	1967-68 Gordon M. Marshall
1920-21 W.H. Coon*	1968-69 Bert J. Levin
1921-22 H.A. McKim*	1969-70 George C. Stirling
1922-23 R. Gordon McLean*	1970-71 Wilfred J. McColeman
1923-24 J.A. Bothwell*	1971-72 Miet A. Kamienski
1924-25 Arthur Day*	1972-73 Don M. McKee
1925-26 W.G.L. Spaulding*	1973-74 Bernard N. Crystal
1926-27 H.G. Robb*	1974-75 William S. MacKenzie
1927-28 R.S. Woollatt*	1975-76 Robert S. McKegney
1928-29 W.B.T. Amy*	1976-77 Ronald S. Anco
1929-30 T.E.C. Butler*	1977-78 Murray Wagman
1930-31 E.C. Veitch*	1978-79 Gordon Perlmutter
1931-32 J. W. McDonald*	1979-80 Robert H. Pick
1932-33 Thomas R. Marshall*	1980-81 Len Shapira
1933-34 Edmund A. Grant*	1981-82 Ronald F. Martin
1934-35 Frank Martin*	1982-83 Ronald Traub
1935-36 William J. Kerr*	1983-84 Arthur J. Breglia
1936-37 Stanley S. Crouch*	1984-85 James T. Hing*
1937-38 Harvey W. Reid*	1985-86 Alexander J. Puskas
1938-39 Harold Hoag*	1986-87 Stewart Sigesmund
	1987-88 Donald Stewart
	1988-89 Barry Chapnick
	1989-90 Aldo Boccia

REPORT FROM THE MEDIATIONS COMMITTEE

Dentistry in the 1990's will present us with new and complex dilemmas as a result of new technology, government involvement, third party payment options and increasing consumerism. This will likely make our relationships with our patients more complex and demand our increased attention.

The Code of Ethics adopted by the Canadian Dental Association states "Society has given Dentistry the privilege of self-regulation. In return, Dentistry owes Society responsible management of the profession". As members of this profession, we must provide competent care in a caring and fair manner to all patients to ensure our mandate.

The Mediations Committee receives many enquiries and complaints, some more serious than others. Based on what we receive I suggest that it would be prudent of each member of our profession to consider and evaluate some of the following questions as related to their own practice.

Do you monitor the handling of patients by your office staff?

Do you downgrade the work of a fellow dentist to make you look better?

Do you re-do work that does not meet your expectations?

Do you blame the laboratory for problems that may stem from what you give your technician?

Do you allow patients to see and approve the appearance of restorations before they are completed and cemented?

Do you visualize and treat caries when they are not there?

Do you say "No charge for this visit"?

As has been said many times in the past, Communication is one of the greatest tools in preventing misunderstandings with patients. Our Mediations Committee attempts to resolve problems that arise by communicating with both patient and dentist when often all that is needed is better communication with the dentist and patient.

Let us re-think our relationships so that they are mutually beneficial and uphold a positive image of Dentistry to the public.

In closing I would like to thank the members of the Mediations Committee and our Academy staff, Sharon, Nancy and Raisyl who are often the first to deal with an angry patient by the initial phone contact.

Gilbert Chapnick, D.D.S.
Mediations Co-ordinator

HOBBY AND CRAFT EXHIBITION*

WHAT WILL HAPPEN TO YOUR OFFICE IF YOU ARE SICK OR DISABLED?

ACADEMY OF DENTISTRY MUTUAL AID PLAN

This is a group of dentists who will help a member of the group at a time of distress. Ideally the group will number about twenty, but the number fluctuates as people join and leave. If you are a member of this group, and are unfortunate enough to be unable to practise because of illness or accident, the members of the group will take turns in operating your practice, with your auxiliaries, to a maximum of four days per week, for a number of weeks. This will provide service for your patients in case of emergencies, completion of treatment in progress and maintain the flow of recall patients.

Some of the benefits are, maintaining service availability to your clientelle and employment for your auxiliaries as well as preventing the formation of a huge backlog of patients waiting for your return. If it becomes necessary for a practice to be sold, the plan can maintain the viability of the practice until the sale can be completed. The other members of the plan will come to your office one day at a time, on a rotating shcedule. If the group numbers 20, the remaining 19 dentists would be responsible for about one day each, every five weeks for each disabled dentist. Fees are charged in the usual way at the stricken dentist's office, and the contributing dentist does not receive compensation.

The plan has been available for several years and has worked well to date for the stricken dentist. You might want to ask a friend or two to consider joining, or perhaps start a whole new group. A set of by-laws has been adopted, but they can be changed if the need arises.

Further details and a copy of the by-laws are available at the Academy office – 967-5649 or by calling Berril Garshowitz, 229 Yonge Street, Ste. 213A, Toronto, M5B 1N9, telephone 368-3375.

DIALOGUE IN DENTISTRY PROGRAM

Are your patients satisfied with their dental insurance plans? Are *you* satisfied with your patients' dental plans? These are critical questions that need to be answered in the affirmative if one is going to enjoy a successful dental practice in today's competitive marketplace.

If you are completely happy with the design of the dental plans that your patients are presenting to you, then read no further. However, if you are concerned that there is an alarming trend in plan design that is infringing on your ability to practise high quality dentistry for your patients, then read on.

It is becoming quite apparent that insurance companies, benefits consultants and insurance brokers are creating dental insurance plans that can and most likely will establish the standards of clinical dental practice in the future. By *arbitrarily* restricting reimbursement of dental expenses incurred by patients under indemnity-type dental plans, there is an increased probability that the dental care received will be adversely affected.

You may have read elsewhere that capitation is allegedly "dead" and that insurance companies are no longer marketing dental benefit plans based on this model. This is only wishful thinking, because for instance, Blue Cross is actively promoting a dental plan under the title "Managed Dental Care" in the Toronto area which is based on a capitation scheme. Furthermore, Toronto dentists continue to report the loss of patients to other newly created capitation dental plans that employers feel justified in providing for their employees.

Is there anything you can do? Most certainly there is. To begin with, *talk* to your patients and *ask* them if they're satisfied with their dental plan. *Listen* carefully to their answers; if they are not happy with the terms/coverage of the contract, or their plan is coming up for renewal, or they give you a hint that they're looking at alternative dental plan designs (eg. capitation) then offer your expert dental assistance to help resolve their difficulties. *Know* who your patients are: employers, personnel managers, insurance brokers, benefits consultants and those who have the responsibility for looking after or influencing employee benefits are all individuals who particularly should be spoken to. Either dentist and/or staff members should feel free to engage in this dialogue.

continued

Explain the virtues of a properly designed dental plan that takes into consideration the needs of the employer (eg. cost containment features, having “happy” employees), the patient (eg. obtaining coverage for those procedures that they will benefit from), and the dentist (eg. that emphasizes that dentist-patient relationship and puts the onus on the dentist to determine and justify the treatment both recommended and performed).

If you are too busy in your office or are uncomfortable in pursuing these matters personally, you are encouraged to refer interested individuals to the Academy’s *“Dialogue in Dentistry”* Program. We will help the employer or plan provider on your behalf, by providing free professional advice on the design of an appropriate dental plan for his or her employees.

D.I.D. is also supporting the profession by currently marketing our services to the insurance brokers and benefits consultants. It is our objective to provide them with our expert “technical” support in explaining the details and necessity for the various procedure codes available under dental insurance plans. In this manner, D.I.D. can increase the dental knowledge of the consultants/brokers and simultaneously, help them “look good” in the eyes of their clients. By working together, we hope to contact more employers and to achieve the creation of high quality, affordable dental plans meeting the needs of all parties involved.

The availability of dental benefit plans has vastly improved access to dental care with a resulting benefit to the public and the dental profession. However, is it becoming a situation of *“the tail wagging the dog”*? Are dental plans rather than dentists, determining the quality of care being provided?

It is time for dentists to get involved. Assist your patients in obtaining high quality dental plans that will preserve the dentist-patient relationship.

Take advantage of *“Dialogue in Dentistry”*, we’re here to help. We look forward to hearing from you!

ASSOCIATE PLACEMENT SERVICE

The Associate Placement Service continues to be an important part of the Academy's function in the Metropolitan Toronto area.

At the present time there are more dentists seeking placements than there are vacancies. We urge all those who require associates to call the Academy office with their requirements.

To facilitate the Placement Service, we would ask that you inform the Academy office once your requirements have been met.

Microbex... Leading the way in Microbial Control

In the complex world of microbial control, the profession has expressed a need for practical prevention techniques. Microbex is committed to be the leader in Control Systems.

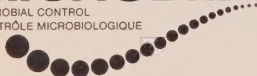

Microbex features a fully equipped and up to date research laboratory staffed by experienced, innovative chemists and microbiologists. Utilizing UV, Visible and IR Spectroscopy, Microscopy, GC, HPLC and SEC, Turbidity, pH, RI, conductivity and culture methods, the company continues to push ahead into new and exciting areas of product development.

Microbex offers an exceptional system of infection control products enriched with quality services in Education, Consulting and Sterilization Equipment Monitoring.

Microbex guarantees product quality that users can rely on.
